## TITRE 1

*Quid? qui se etiam nunc subsidiis patrimonii aut amicorum liberalitate sustentant, hos perire patiemur?*

*An, si qui frui publico non potuit per hostem, hic tegitur ipsa lege censoria; quem is frui non sinit, qui est, etiamsi non appellatur, hostis, huic ferri auxilium non oportet?*

*Retinete igitur in provincia diutius eum, qui de sociis cum hostibus, de civibus cum sociis faciat pactiones, qui hoc etiam se pluris esse quam collegam putet, quod ille vos tristia voltuque deceperit, ipse numquam se minus quam erat, nequam esse simularit.*

*Piso autem alio quodam modo gloriatur se brevi tempore perfecisse, ne Gabinius unus omnium nequissimus existimaretur.*

## TITRE 2

*For this project, I have exclusively used fonts labeled as open-source or freeware, since I run a blog promoting open-source technology.*

*I assume that not one in a hundred people think about the licensing of fonts but, in reality, fonts can be copyrighted like music, software or any other intellectual property...*

*and rightly so! A quality font is a lot of work to design. Even so, there are many good free fonts.*

## TITRE 3

*Quid? qui se etiam nunc subsidiis patrimonii aut amicorum liberalitate sustentant, hos perire patiemur?*

*Although I have carefully selected the fonts for this project, you could probably substitute "Times New Roman" and "Ariel" (or similar) with good results.*

*A vous de proposer  
des articles et photos*
